SKILLS

- **Languages:** C, C++, SQL, Shell Scripting, Python.
- **Frameworks:** SK-LEARN, Tensor Flow, Py Torch.
- **Tools/Platforms:** Jupyter Note Book, Vs Code, Google Colab .
- **Soft Skills:** Problem-Solving Skills, Team Player, Project Management, Adaptability

TRAINING

- **Data Structure and Algorithm using Java Programming** July 20
- Completed summer training on Data Structures and Algorithms using Java, covering core concepts like arrays, linked lists, stacks, queues, trees, and graphs.
- Implemented sorting, searching, and optimization techniques through hands-on coding practice. Gained improved problem-solving skills and understanding of time & space complexity analysis.

PROJECTS

- **No-Show Patients Prediction – Machine Learning Project:** [Github](#) April 2025
- Developed a Machine Learning model to predict patient no-shows improving appointment scheduling and operational
- Performed data preprocessing including data cleaning and handling missing values to enhance data quality
- Applied feature engineering techniques to extract meaningful patterns and improve model performance
- Implemented multiple algorithms such as Logistic Regression Random Forest and XGBoost
- Evaluated model performance using metrics like Accuracy Precision Recall and F1 score
- Analyzed results to identify key patterns and risk factors contributing to patient no-shows
- Generated actionable insights to support better decision making and optimize healthcare operations
- **AI-Powered Inventory Management System:** [Github](#) March 2025
- Developed an intelligent AI powered inventory management platform to predict product demand optimize stock levels and automate restocking decisions using machine learning algorithms
- Implemented advanced modules including demand forecasting anomaly detection and supplier risk analysis to enhance inventory efficiency and reduce stockouts
- Designed and developed RESTful APIs using FastAPI and integrated a database system for real time inventory tracking analytics and data management
- Built an AI driven recommendation engine to generate purchase order suggestions and actionable business insights
- Developed a chatbot based decision support system for querying inventory data and forecasts enabling smarter operational decision making

CERTIFICATES

- Security and protection| NPTEL. Mar 2025
- Completed **Bits and Bytes** Certification from **Google**. Dec 2023

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.9 Since August 2023
- **SR Jr Collge** Ananthapur A.P
Intermediate; Percentage: 85 April 2021 - March 2023
- **Saint Thomas High School** Ananthapur A.P
Matriculation; Percentage: 100 March 2021
